

Dwarf Purple Beech

European Beech

(*Fagus sylvatica* 'Purpurea Nana')

A very dense and full compact grower. Intense purple leaves cloak the plant through spring and summer. Copper tones in autumn give way to winter exposure of the smooth, gray bark, typical of the species. An oval form, it is well suited for the smaller garden that can't accommodate larger European Beech forms.

Characteristics

Height	12'
Spread	8'
Shape	Upright
Foliage	Purple Red
Fall Color	Bronze
Exposure	Full Sun to Part Shade
Hardiness	Zone 4
Deer Resistance	High
Annual Growth Rate	8-12"
